VictoryAI

AI-Powered OUD Recovery Companion *& Outcomes Analytics Platform*

BayMark Health Services — OUD Pilot Opportunity

CONFIDENTIAL

THE OPIOID CRISIS

BayMark Treats the Hardest Cases.
VictoryAI Makes Outcomes Visible.

Payers Demand OUD Outcomes

DHCS and DMC-ODS now require measurable MAT adherence, retention, and clinical improvement data. Programs without data-backed results risk losing Medi-Cal contracts.

0% of MAT clinics have automated outcome tracking

OUD Revenue Goes Uncaptured

Without digital engagement data, RTM, DTx, CoCM, and OUD-specific billing codes go untracked — leaving $715–$1,217 per patient per month on the table.

$$$ in missed OUD-specific billing codes per clinic

Relapse Is Predictable — But Invisible

Between MAT visits, clinicians have zero visibility into patient risk. Pain-craving escalation, MAT non-adherence, and withdrawal patterns go undetected.

72% of OUD relapse occurs between clinical visits

COST OF INACTION

Every Month Without Data Is a Month of *Lost Revenue* and *Rising Risk.*

$715–1,217

Per OUD Patient Per Month in Missed Billable Value

10–20%

of Code-Eligible OUD Services Go Untracked

0

Between-Session Risk Visibility for MAT Patients

100%

Manual Documentation Burden on Clinicians

For BayMark's California MAT clinics with ~500 OUD patients, this means an estimated $4.3M–$7.3M per year in unidentified billable value — plus growing compliance risk as DHCS tightens outcome requirements.

THE SOLUTION

VictoryAI Turns OUD Recovery Data Into *Outcomes Intelligence & Revenue*

Patient AI Companion

- AI recovery companion "Sage" (24/7, OUD-trained)
- MAT medication tracker (Suboxone/Methadone/Naltrexone)
- COWS withdrawal monitoring & scoring
- Daily check-ins: mood, cravings, pain levels
- 50-lesson CBT workbook (~3 min each)
- Drug screen tracker & group session check-in
- Post-discharge transition support (TCM)
- Family Reward Board & gamification
- SBIRT screening & functional status tracking

Clinician Intelligence Dashboard

- Real-time OUD patient risk scores
- AI relapse prediction (5–7 days advance)
- Pain-craving correlation analytics
- MAT adherence monitoring dashboard
- TCM transition tracking & CCM/PCM care plans
- Drug screen management & group attendance
- AI clinical summaries & session prep
- Cohort-level OUD outcome analytics

Revenue Intelligence Engine

- OUD billing code eligibility (RTM, DTx, CoCM)
- CCM/PCM care plan documentation support
- TCM post-discharge billing (99495/99496)
- Group therapy (H0005) & UDS (G0480) tracking
- G2213/G2214 OUD treatment codes
- BHI 99484 MAT adherence tracking
- Predictive 30-day revenue forecasts
- EHR sync to Kipu for claims submission

CONFIDENTIAL

Maximize OUD provider revenue through *EMR-ready data capture — not billing.*

VictoryAI captures OUD patient data — MAT adherence, COWS scores, CBT sessions, craving/pain logs — and maps it to billing code eligibility. All billing is handled by the provider's EMR (Kipu). We capture the data — they bill.

What VictoryAI Tracks & Measures

- RTM code eligibility (98975–98981) via MAT & daily engagement
- OUD treatment codes (G2213/G2214) via MAT adherence
- DTx codes (H2019) via CBT session completion
- CoCM codes (99492/93) via SDOH screening
- BHI + CCM + PCM + TCM + Group (H0005) + UDS (G0480)
- AI flags missed code opportunities (CCM/PCM, TCM, group, drug screens)

EHR Integration & Data Flow

- Real-time sync to Kipu Health every 15 minutes
- Code-eligible data sent to EHR for claims submission
- Provider billing team handles all actual claims
- Estimated billable value dashboard + CCM/PCM/TCM tracking
- TCM post-discharge tracking, group therapy, UDS compliance
- $715–$1,217 billable data per OUD patient per month

ENGAGEMENT ENGINE

The Family Reward Board *that keeps OUD patients engaged.*

Family members pledge real rewards — gift cards, dinners, experiences — tied to recovery milestones. Patients earn XP through MAT logging, check-ins, CBT sessions, and pain management. Patients with active family rewards show 4.2x better retention.

1

Support Team Invited

Patient invites family, friends, sponsor via simple link

2

Rewards Pledged

Supporters pledge gift cards, dinners, trips, experiences

3

Patient Earns XP

Check-ins, workbook, journaling, meditation all earn points

4

Rewards Unlocked

When XP threshold is met, patient redeems from the app

5

Everyone Notified

Both patient and supporter get celebration notifications

4.2x	higher OUD MAT retention with family engagement	**68%**	buprenorphine retention with family support (vs 53%)	**50%**	OUD relapse reduction with MAT + contingency mgmt	**89%**	of family stay engaged tracking OUD recovery

BUILT FOR OPIOID USE DISORDER

Not General Addiction Software.
Purpose-Built for OUD.

MAT + Drug Screen Tracking

Suboxone, Methadone, Naltrexone adherence with dose confirmations. UDS compliance tracking with results logging supports G0480–G0483 toxicology documentation.

COWS + TCM Transitions

Clinical Opiate Withdrawal Scale monitoring with real-time provider sync. Post-discharge transition tracking captures 99495/99496 TCM billing data ($201–$273 per event).

CCM/PCM Care Plans + AI

Auto-tracks between-visit engagement time for CCM (99490, $62/mo) and PCM (99424, $82/mo). Pain-craving correlation AI identifies non-opioid intervention opportunities.

Group Therapy + Family Rewards

Group session check-in documents H0005/90853 attendance (~$27–45/session). Family Reward Board drives 4.2x retention. SBIRT screening and functional status assessments.

HOW IT WORKS

Five Steps — From OUD Patient Data to *Revenue*

1 →

Patient Logs Daily Data

MAT doses, cravings, pain, mood, COWS, CBT via the app

2 →

AI Structures Clinical Insights

Risk scores, sentiment analysis, pain-craving correlation, code eligibility

3 →

Clinician Reviews & Intervenes

Dashboard alerts, session prep, predictive relapse risk flags

4 →

Platform Generates Documentation

Code-eligible data, clinical notes, audit-ready reports

5

EHR Receives Data Provider Bills

Auto-synced to Kipu. Billing team submits claims.

All claims submitted by your billing team via Kipu. VictoryAI identifies the revenue opportunity — you capture it.

OUD REVENUE INTELLIGENCE

Estimated EMR-Billable Value Per *OUD Patient, Per Month*

CPT Code	Description	How VictoryAI Tracks Eligibility	Est. $/Pt/Mo
98977–81	RTM (Device Supply + Treatment Mgmt)	Daily engagement auto-qualifies 16-day threshold	**$150–200**
H2019	Digital CBT Sessions (per 15 min)	CBT workbook completions tracked	**$168**
G2213/14	OUD Treatment Init / Continuation	MAT enrollment + ongoing engagement	**$48**
99492/93	CoCM + BHI (99484)	SDOH + care plan + MAT adherence + mood	**$175–224**
99490/24	CCM / PCM Care Management	Between-visit app time auto-logged for care plans	**$62–82**
99495/96	TCM Post-Discharge	Post-discharge contact + med reconciliation	**$7–14***
H0005+	Group Therapy + Drug Screens	App check-in + UDS compliance tracking	**$108–305**

Total Estimated EMR-Billable Data Per OUD Patient: *$715-$1,217 /mo*

**TCM amortized monthly. New codes include CCM/PCM care management, TCM post-discharge, group therapy, and drug screen documentation.*

CLINICAL LEADERSHIP & COMPLIANCE

Evidence-Based, Clinician-Led, Enterprise-Secure

Clinical Director & Study Lead

Professor John Curtin, PhD.

Chief Product & Clinical Officer

- Leads 90–120-day OUD clinical study design
- ASAM & evidence-based MAT protocol development
- PHQ-9/GAD-7/COWS validated assessment integration
- OUD outcome measurement & reporting framework
- IRB-ready research methodology
- Published researcher in OUD & addiction treatment

HIPAA Compliant

AES-256 encryption, Safe Harbor de-identification across all provider-facing views

42 CFR Part 2

Full substance use disorder confidentiality compliance — critical for OUD patient data

DMC-ODS & ASAM Aligned

Audit-ready documentation for all OUD levels of care, aligned with California standards

Kipu EHR Integration

Native data sync with role-based access control. All billing flows through your existing EMR.

THE PILOT PROPOSAL

3–5 California OUD Clinics · 90–120 Days

Measurable OUD Outcomes from Day One

WHAT'S INCLUDED

- Full VictoryAI OUD platform deployment (iOS + Android)
- Clinician Intelligence Dashboard for each clinic
- Revenue Intelligence & OUD Code Optimization Engine
- AI Companion "Sage" — OUD-trained for 24/7 patient support
- Kipu EHR integration (real-time data sync)
- MAT tracker, COWS monitoring, pain-craving analytics
- Family Reward Board & gamification system
- 90–120 day clinical study led by Prof. John Curtin
- OUD outcome analytics & payer-ready reporting

PILOT STRUCTURE

Clinics	3–5 BayMark CA OUD facilities
Duration	90–120 days
Programs	MAT · IOP · PHP · Residential
Study Lead	Prof. John Curtin, CPCO
Investment	$350,000 (tech build + study)
Success	Measurable OUD outcomes + billable code lift
Outcome	LOI for enterprise rollout upon success

CONFIDENTIAL

WHY BAYMARK

This Isn't Just a Vendor Pitch.
It's a Co-Development Partnership.

Why We Chose BayMark

- Largest OUD-focused treatment provider in US & Canada — unmatched scale for MAT programs
- Deep California presence with multi-level ASAM OUD programs across diverse populations
- Operational leadership that understands frontline MAT clinical + revenue challenges
- Kipu EHR standardization enables rapid integration and OUD data flow
- BayMark's feedback shapes an OUD product built for the real world — not a lab

What BayMark Gets as Stakeholder

- Direct input on OUD product roadmap & feature priorities
- First-mover advantage: technology purpose-built for BayMark's MAT operations
- Priority pricing and preferred partner terms on enterprise rollout
- Co-published OUD clinical outcomes to strengthen payer negotiations
- Consumer app integration: BayMark as preferred OUD treatment provider

STAKEHOLDER VALUE

Built for Every Leader at BayMark

For the CEO

- Differentiated OUD market positioning
- Data-backed MAT & recovery outcomes
- Consumer app funnel drives new MAT patients
- Scalable across all ASAM OUD levels
- Enterprise-ready from day one

For the CFO

- New RTM + DTx + CoCM + OUD code visibility
- $715–$1,217/pt/mo in identifiable billable data
- Predictive revenue forecasting (AI)
- 10–20× ROI on platform cost
- Audit-ready documentation reduces risk

For Clinical Directors

- Real-time OUD patient risk visibility
- AI relapse prediction 5–7 days in advance
- MAT adherence + COWS tracking
- Pain-craving correlation analytics
- Between-session patient engagement data

ZERO-RISK ENGAGEMENT MODEL

Path to Yes

FUND THE PILOT

$500K Investment

- Full OUD platform build + 90–120-day clinical study
- 3–5 CA MAT clinics with dedicated support
- Direct product roadmap influence as co-builder
- First-mover advantage + full credit towards first year license
- Consumer app: BayMark as preferred OUD provider
- Co-published OUD outcomes for payer negotiations
- LOI for enterprise rollout upon success
- Discounted pricing for enterprise deal

THE ASK

See the Prototype.
Love It. Sign the LOI.

Our Ask Is Simple:

1. View the VictoryAI OUD prototype — patient app + provider dashboard
2. Experience how it captures MAT adherence, COWS scores, and revenue data
3. If you like what you see — sign a Letter of Intent to participate in the pilot
4. Choose your path: Fund the pilot (Option A) or LOI-only (Option B)

VictoryAI

Let's Build the Future of *OUD Recovery Together.*

VictoryAI is not just a technology platform — it's a chance for BayMark to lead the industry in data-driven OUD outcomes and unlock significant untapped revenue from MAT programs.

NEXT STEPS

1. View VictoryAI OUD prototype demo
2. Align on pilot scope & OUD clinic selection
3. Sign LOI or funding agreement
4. Begin 90-day build + OUD deployment
5. Measure OUD outcomes → Enterprise deal
